DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Gutoff (US 4,275,587). Gutoff discloses the claimed invention, a method and system for determining wettability of a substrate coated with a particulate gelatin coating. Gelatin consists of particulate colloid material. The coated substrate is inserted into a test liquid forming a liquid meniscus which is optically analyzed to determine the meniscus height and therefrom to calculate the wettability of the surface. See abstract, column 3, column 6, and column 10 lines 23-29.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gutoff (US 4,275,587) in view of Fukunaga (US 5,815,256). Gutoff teaches the claimed invention except for optical meniscus profiling. Fukunaga teaches optical meniscus profiling to determine the wettability of an immersed substrate; see Figures 4-8, 12, 15, 16, column 9, and columns 15-16. It would have been obvious to use profiling as taught by Fukunaga in the invention taught by Gutoff to analyze the meniscus, since this is shown to present a fuller depiction of the wettability of the entire substrate area.

Allowable Subject Matter

Claims 5 and 8 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims, because the prior art does not teach or fairly suggest a layer of adhesive material bonding a particulate to a substrate in the claimed method and apparatus.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: JP 9-273,986.
